

SolarMax Energy Systems

Price of smart photovoltaic inverter

Overview

A solar inverter costs \$2,000 on average, with prices ranging from \$800 to \$5,000 —though the overall price is wrapped up in your solar panel installation. The size of your system, the type of inverter, and the efficiency rating affect your final cost. Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

How much does a solar inverter cost?

The cost varies based on type and capacity, ranging from \$500 to \$10,000+.

2. Which solar inverter is best for home use?

Fronius Primo, SMA Sunny Boy, and Enphase IQ 7A are among the best options.

Do solar inverter manufacturers make solar panels?

It's a common misconception that solar inverter manufacturers also produce solar panels. While this is true for some, most inverter brands are designed to work with various solar panel models. Leading solar panel manufacturers include JA Solar, Canadian Solar, Trina Solar, Longi Solar, and First Solar.

Which solar inverter brands work with different solar panels?

While this is true for some, most inverter brands are designed to work with various solar panel models. Leading solar panel manufacturers include JA Solar, Canadian Solar, Trina Solar, Longi Solar, and First Solar. Several essential factors should be considered when choosing a solar inverter and panel system.

What is a solar inverter?

With expertise in photovoltaic systems and solar technologies, she explores the latest advancements in solar panels, inverters, and integration techniques. A solar inverter is a device that converts the DC generated by solar panels into the AC required by household appliances and the power grid.
