Price of solar energy application system in Macedonia

Overview

What is the current state of solar energy in North Macedonia?

This article explores the current state of solar energy in North Macedonia, the opportunities for growth, and the challenges that must be addressed to maximize its potential. By the end of 2022, the country had reached a photovoltaic capacity of approximately 144 MW, with projections indicating rapid growth in the coming years.

What are the benefits of expanding solar energy capacity in North Macedonia?

One of the most compelling benefits of expanding solar energy capacity in North Macedonia is its potential to enhance energy independence. In 2021, approximately 33.2% of North Macedonia's electricity consumption was covered by imports.

How much solar power does Macedonia have in 2022?

By the end of 2022, the country had reached a photovoltaic capacity of approximately 144 MW, with projections indicating rapid growth in the coming years. In 2023 alone, North Macedonia saw an impressive increase in solar capacity, with new installations contributing to a total increase of 251% compared to the previous year.

What is the cost of electricity in Macedonia?

The cost of electricity in Macedonia, March 2023 is 0.119 U.S. Dollar per kWh for households and 0.210 U.S. Dollar for businesses. This includes all components of the electricity bill such as the cost of power, distribution and taxes.
