Replacement of solar photovoltaic panels

Overview

Should I move or reinstall my solar panels?

Working with experts is crucial when moving or temporarily removing your solar panels. Improper removal or reinstallation can lead to performance issues or damage. At Suntrek, we ensure the highest standards are met throughout the solar panel removal service process.

What is solar panel removal & reinstallation?

Solar panel removal and reinstallation means removing solar panels from the mounting structures, transporting them (if necessary), and installing them again on the same or different roof or surface.

How much does a solar panel removal & reinstall cost?

Calculating the price of solar panel removal and reinstallation predominantly relies on your system's size, the complexity of your roof, and the status of any necessary repairs. HomeAdvisor says the average cost to remove and reinstall solar panels is between \$1,000 and \$3,000, depending on the project's complexity.

Should I remove solar panels to replace roof sections?

If you need to remove solar panels to replace roof sections, having a solar expert do the work can make the project go smoother. Additionally, roofers are rarely trained to install home solar panels and maintain solar power systems.

Does SunTrek reinstall solar panels?

At Suntrek, we provide professional solar panel removal and reinstallation services. Our team handles every step of the process, ensuring that your solar system is safely reinstalled and continues to perform at its best. Working with experts is crucial when moving or temporarily removing your solar panels.

Can solar panels be reinstalled on a new roof?

Relocation of Solar Panels: If you are remodeling your home or building an addition, you might need to relocate your solar system to a new roof area. This ensures your system continues to operate efficiently while optimizing exposure to sunlight. Suntrek's team will safely remove and reinstall your solar panels in the most advantageous location.
