

SolarMax Energy Systems

Romania 300MW hybrid energy storage power station

Overview

Does Romania have a battery energy storage plan?

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's northwest has flipped the switch.

What is Romania's most important energy project?

Earlier this month, Burduja reported progress on what he terms as “the most important project for the Romanian energy system” – the 1 GW Tarnița-Lăpuștești pumped storage hydropower plant. Romania resumed the development of the project last year, upping the planned capacity from 500 MW to 1 GW.

How will Romania grow its energy storage fleet?

Romania aims to exponentially grow its energy storage fleet over the next couple of years, as it works on its plan to deliver 36% of the nation's energy to come from renewables by 2030, with 8.3 GW of solar and 7.6 GW of wind, and phase out coal by 2032.

Is Axpo ready to build a battery storage facility in Romania?

The Axpo Group wants to have in Romania at the "ready to build" stage electricity storage facilities with batteries, with a total installed delivery capacity estimated at around 300 MW, independent or integrated within some electricity production capacities, according to a decision of the local subsidiary, consulted by Economica.net.
