Romania battery swap station energy

Overview

Where are e-mobility rentals battery exchange stations located?

The new battery exchange stations will be installed in the car parks of ten Kaufland shops in Constanța, Cluj-Napoca, Iași, Brașov, and Timișoara by the end of the year. However, the e-Mobility Rentals stations are not large, garage-like swap stations, like Nios Power Swap Stations. That is because e-Mobility Rentals uses small electric vehicles.

How much does Romania spend on battery energy storage in 2026?

Romania has also earmarked EUR 199 million to support new capacities for the production and recycling of batteries and solar cells and panels. With this reopened bidding, the ministry aims to see the two-hour duration battery energy storage system (BESS) facilities up and running by mid-2026. The budget for the BESS projects is EUR 79.6 million.

Will Romania reopen a call to support battery storage projects?

Romania's Ministry of Energy has reopened its call to support projects of battery storage for renewable energy integration, seeking at least 240 MW and 480 MWh of resources. The original call, which referred to at least 620 MWh, was expected to see projects selected by the end of 2023, according to reports.

Where are the new battery exchange stations being installed?

So far, however, the service has been limited to the capital, but is now expanding to other cities. The new battery exchange stations will be installed in the car parks of ten Kaufland shops in Constanța, Cluj-Napoca, Iași, Brașov, and Timișoara by the end of the year.

How do swap batteries work?

The swap batteries are thus portable, and the stations are similar to the concept offered by companies such as Gogoro. The batteries are stored and

charged in a cabinet. When required, the compartment is opened with a suitable, fully charged battery and the empty battery from the vehicle is connected for charging.
