

SolarMax Energy Systems

Romanian container power generation BESS

Overview

How many MW is a Bess project in Romania?

This project will feature a 127 MW power rating and an energy storage capacity of 254 MWh, making it one of the largest BESS projects in Romania to date. However, R.Power has not disclosed when the project will become operational.

Does Romania have a grant program for battery energy storage systems?

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities – wind, solar, or hydro. Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of EUR 150 million (\$158 million).

What is Romania's energy storage requirement?

Minister of Energy Sebastian Burduja reportedly declared at a conference that Romania's storage requirement is 4,000MWh, and that half would be covered by BESS and half by pumped hydro energy storage (PHES) technology.

Should you invest in battery energy storage systems in Romania?

Investors in battery energy storage systems or BESS in Romania are counting on hefty subsidies from the European Union's funds. Energy storage is among the main pillars of the country's energy transition, which has so far mostly leaned on solar power, particularly prosumers.

Which Romanian companies are adding Bess to their renewable assets?

Other Romania-based companies, such as Parapet and Waldevar Energy, have told pv magazine that adding BESS to their renewable assets is a top priority. The May edition of pv magazine features an in-depth look at Romania's solar and energy storage markets.

Who owns a battery energy system in Romania?

Swiss firm AOT Energy has a 2 MW – 1 MWh system in Arad and Portuguese company EDPR Romania owns one of 1.2 MW and 1 MWh in Cobadin in Constanța county. Earlier this month, Electrica and Renovatio Trading received EUR 3.4 million and EUR 3 million, respectively, for battery energy storage projects in Romania.
