SolarMax Energy Systems

Rooftop photovoltaic panel installation costs

Overview

How much does it cost to install a solar panel?

Solar panel installation costs $10,000 to $30,000 on average before tax credits or incentives. Traditional solar panels cost less than solar shingles but are more efficient and produce more wattage. *Including asphalt shingle roof replacement.

Should you replace your roof before installing solar panels?

If you're replacing your roof before solar system installation, consider steel standing seam. It combines the lightweight strength to support solar panels and the longevity to outlast them. The ideal roof for solar is one facing south with enough slope to properly tilt the panels and enough room for them.

Can solar panels be installed on a roof?

Home solar panels are generally installed on rooftops, so the system's design largely depends on the roof's characteristics. Complex roofs with multiple faces, dormers, vents, or skylights can increase installation and design labor costs, but they may also limit the number of panels you can install.

How much does it cost to install a new roof?

The national average cost to install a new roof (with standard materials, not solar shingles) is $14,643, while the typical upfront cost to install a solar roof is $49,700 and $34,700 after the 30% federal tax credit. Many factors will affect the cost of installing a new roof on your house, such as:.

Are solar roof shingles worth it?

Solar roof shingles are typically not worth the high cost and may not pay for themselves in their lifetime. However, a solar roof reduces electric bills, is usually considered more aesthetically appealing than solar panels, and is more likely to receive HOA approval in some communities.

How much electricity does a solar roof generate?

A solar roof generates 4 kW to 23 kW or more of electricity, depending on the roof and system size, sun exposure, and weather. Each active solar shingle or tile has a maximum power output of 45 to 80 watts. Hire an experienced solar roof installer near you to ensure your system is eligible for tax credits and rebates.
