

## SolarMax Energy Systems

# Saudi Arabia s new energy storage industry output value

## Overview

---

Will Saudi Arabia develop a storage capacity of 48 gigawatt-hours?

Under the National Renewable Energy Program, which is overseen by the Ministry of Energy, Saudi Arabia aims to develop a total storage capacity of 48 gigawatt-hours by 2030. To date, projects totaling 26 gigawatt-hours have been tendered and are currently in various phases of development.

Is Saudi Arabia a leader in battery energy storage?

The Kingdom enters the top ten global rankings for battery energy storage with ambitious future capacity goals. Saudi Arabia is establishing itself as a significant player in the energy storage sector, now ranked among the top ten global markets for battery energy storage.

How big is Saudi Arabia's renewable energy market?

Saudi Arabia wants to increase the generation capacity of renewable energy sources to about 58.7 gigawatts by 2030, of which 40GW would be from solar and 16GW from wind energy. The report also shows that the size of the renewable energy market in the countries of the Gulf Cooperation Council (GCC) stands at 17 gigawatts.

What does Saudi Vision 2030 mean for energy production?

The goals outlined in the Saudi Vision 2030 initiative are aligned with this ambitious energy production strategy. The Kingdom plans to operate 8 GWh of energy storage projects by 2025, expanding this to 22 GWh by 2026, which would place it as the third-largest global market for energy storage, following China and the United States.

How is Saudi Arabia transforming its energy sector?

Saudi Arabia's energy sector is undergoing a comprehensive transformation, reinforcing its leadership position in the production and export of a variety of energy forms. By the end of 2024, it is projected that the total capacity of

renewable energy projects across all stages of development will reach 44.1 GW.

How much energy does Saudi Arabia use?

Energy consumption data were obtained from the IEA (2018a). Fig. 1 shows that between 1986 and 2016, aggregate energy consumption in the Saudi industrial sector grew from 4.5–42.3 million tonnes of oil equivalent (Mtoe). Fig. 1 also shows the breakdown by fuel type, highlighting the dominant role that fossil fuels play. 3

## Saudi Arabia s new energy storage industry output value

### Saudi Arabia Among World's Top 10 Global Markets in Energy Storage

The Kingdom plans to operate 8 GWh of energy storage projects by 2025, and 22 GWh by 2026, positioning itself as the third largest global market in energy storage projects, following China ...
