

SolarMax Energy Systems

Serbia Energy Storage Base Station Project Bidding

Overview

Will Serbia develop a solar power plant?

The Serbian government is seeking a strategic partner to develop at least five PV plants with a cumulative capacity of 1 GW/1.2 GWh and at least 200 MW/400 MWh of battery energy storage. State power company Elektroprivreda Srbije (EPS) will own and operate the assets.

How many MW of solar is installed in Serbia?

The government has formed a working group to organize the tender, select successful bids, and negotiate with the chosen strategic partner. According to the Association of Renewable Energy Sources of Serbia, the country has installed around 50 MW of solar. However, that figure is not exact, as there is no official registry at this stage.

How much does electricity cost in Serbia?

Serbia changed both the price ceiling and the criterion for evaluating the bids. The maximum acceptable bid for wind farms is EUR 79 per MWh, compared to 105 per MWh last time. The ceiling for electricity from photovoltaic plants is EUR 72 per MWh, while it was EUR 90 per MWh last time.

What is the quota of wind power in Serbia?

At the first auctions, the wind quota was 400 MW while the one for photovoltaic projects amounted to 50 MW. There are seven applications in the wind power segment and 33 for solar power. At the first auctions there were nine and seven, respectively. Serbia changed both the price ceiling and the criterion for evaluating the bids.
