

SolarMax Energy Systems

Serbia Energy Storage Equipment Project

Overview

Turkish company Fortis Energy is developing a 110 megawatt-peak (MWp) solar power plant with an integrated 31.2 megawatt-hour (MWh) battery energy storage system (BESS) in Šid, Serbia. The Erdevik project reached a major milestone in January 2025 with the formal approval of the grid connection study. How many MW of battery storage will be developed in Serbia?

Up to 200 MW of battery storage will be developed across the sites. Image: Ministry of Mining and Energy, Tanjug Plans for 1 GW of new solar in Serbia are set to go ahead after the signing of an implementation agreement.

Does Serbia have a solar project?

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar. Figures from the International Renewable Energy Agency state Serbia had deployed a total 137 MW of solar by the end of last year.

What is Serbia's energy strategy?

Serbia is dependent on imports of crude-oil and natural gas, but is endowed by reserves of lignite and the potential of renewable energy sources. Serbia has a strategy to reduce greenhouse gas emissions in the energy sector and to increase the share of renewable in gross final energy production 27% by 2020.

How much electricity does Serbia get from fossil fuels?

Serbia currently gets more than 60% of its electricity from fossil fuels. The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar.

Who owns the large-scale solar and battery energy storage project?

Delivering the utmost flexibility to the Serbian government, the Large-Scale Solar and Battery Energy Storage Project being developed by UGT Renewables will be owned and operated by Electric Power Industry of Serbia (EPS) once completed.

Is solar a good option for Serbia?

A statement published on the Serbian government's website says solar is the most optimal solution to quickly reach large capacities from green sources, without burdening and endangering the stability of the transmission network. Serbia currently gets more than 60% of its electricity from fossil fuels.
