

SolarMax Energy Systems

Serbia smart energy storage battery company

Overview

The answer lies in Belgrade Street Light Energy Storage Company 's innovative approach to urban energy management. In 2025, this Serbian pioneer is rewriting the rules of city lighting through battery storage solutions that would make even Tesla raise an eyebrow. How many MW of battery storage will be developed in Serbia?

Up to 200 MW of battery storage will be developed across the sites. Image: Ministry of Mining and Energy, Tanjug Plans for 1 GW of new solar in Serbia are set to go ahead after the signing of an implementation agreement.

Does Serbia have a solar project?

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar. Figures from the International Renewable Energy Agency state Serbia had deployed a total 137 MW of solar by the end of last year.

Who owns the large-scale solar and battery energy storage project?

Delivering the utmost flexibility to the Serbian government, the Large-Scale Solar and Battery Energy Storage Project being developed by UGT Renewables will be owned and operated by Electric Power Industry of Serbia (EPS) once completed.

How much electricity does Serbia get from fossil fuels?

Serbia currently gets more than 60% of its electricity from fossil fuels. The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar.

What is UGT renewables Serbia solar?

UGT Renewables Serbia Solar is a ground-mounted solar project, which is

planned over 2,000 hectares. The electricity generated from the Serbia Solar PV will offset 1,900,000t of carbon dioxide emissions (CO₂) a year. UGT Renewables Serbia Solar PV will be a 1,000MW solar PV power project developed in a single phase.

Is solar a good option for Serbia?

A statement published on the Serbian government's website says solar is the most optimal solution to quickly reach large capacities from green sources, without burdening and endangering the stability of the transmission network. Serbia currently gets more than 60% of its electricity from fossil fuels.
