Sofia Communication Base Station Wind Power Planning

Overview

How can I check the construction progress of the Sofia Wind Farm?

Check the construction progress of the Sofia Wind Farm's 100 turbines with our interactive Sofia demo. With visualizations of installation milestone progress updated daily and vessel locations refreshed every 2 minutes, tracking the Sofia Wind Farm's development is easier than ever.

What is Sofia offshore wind farm & why is it important?

Sofia will play a critical role in contributing to the UK's clean energy transition and reinforcing energy security." The 1.4 gigawatts (GW) Sofia Offshore Wind Farm is located 195 kilometers off the UK east coast in water depths of 20-35 meters and is RWE's largest offshore project currently under construction globally.

What's happening at Sofia offshore wind farm in 2025?

The year ahead will bring challenges, but 2025 will see Sofia Offshore Wind Farm increase activity on both our onshore and offshore converter assets. We're also excited to soon welcome the turbine installation vessel, the Wind Peak, which will begin installing turbines in the spring.

How many homes will the Sofia Wind Farm Power?

Upon completion, it will power around 1.2 million UK homes. Thanks to LAUTEC's public Sofia demo, you can now follow the project's vessel movements and milestone completions as they happen. Check the construction progress of the Sofia Wind Farm's 100 turbines with our interactive Sofia demo.

Will Sofia Wind Farm achieve clean power by 2030?

Energy Minister Michael Shanks said: "It is great to see this exciting milestone reached for the Sofia offshore wind farm. Today takes us a step closer to achieving our mission for clean power by 2030, with over a million homes

expected to be powered by the cutting-edge turbines of Sofia wind farm.

How many offshore turbines have been installed at Sofia?

So far at Sofia, more than half of the offshore turbine foundations have been installed, the offshore converter station, onshore substation, and onshore and offshore export cables are also in place, in preparation for first generation later this year.
