Solar PV Panel Trap

Overview

What is solar photovoltaic insect light trap?

LITERATURE SURVEY Development of Eco-Friendly Solar Photovoltaic Insect Light Trap for Pest Control (A.M.Gavhande,S.R.Kalbande and V.P.Khambalkar 2019) A solar photovoltaic insect light trap was developed consisted of 10 Wp SPV panel, 12V; 7 Ah lead acid battery, charge controller, dusk to down electrical circuit and adjustable stand.

How does solar insect trap work?

The basic and important result of the project is harnessing the solar energy using the photovoltaic cell (solar panel) during daytime and store the energy using battery to light up the LED bulb (strips are used here) during night to attract the insects and eventually trap them using water in the basin [Fig-13]. Automated Solar Insect Trap.

How does automated solar trap work?

The Automated Solar Trap is placed in the fields where the insects are to be controlled otherwise, they might destroy the crop. During the night the solar is switched on that glows the LED light and the insects are attracted towards the light and they end up in the water-basin.

What is solar trap?

Solar trap is a device, which makes use of solar energy to trap the harmful insects in agricultural fields. The Schematic representation of solar trap is as shown in the above figure [Fig-1].

Are solar insect light traps economically feasible?

The order wise and daily distribution of insects in UV-A blue colour light, the highest population of Lepidoptera insects was observed.It could be inferred that the solar insect light trap was technically as well as economically feasible. ESP Journal of Engineering & Technology Advancements (ESP-JETA) ISSN :

2583-2646 Special Issue.

Can UV-A blue light be used in solar insect trap?

Most of the harmful insects were attracted towards UV-A blue light and hence it is calculated that the use of UV-A blue light in solar insect trap is beneficial in integrated pest management practices (Bhamre et al., 2005). The net present value for the 12 year of cash flow analysis was found to be Rs.9371.69.

Solar PV Panel Trap

Development of Eco-Friendly Solar Photovoltaic Insect Light Trap ...

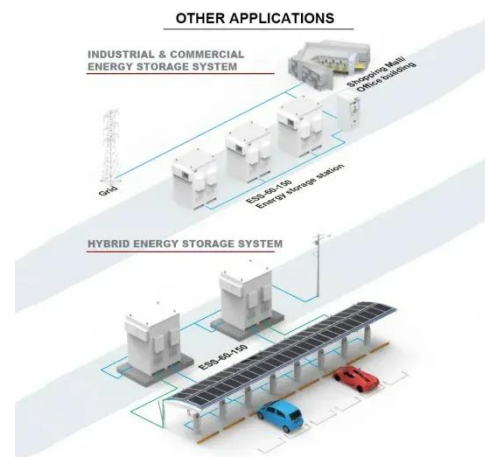

This research presents the design and development of an eco-friendly solar photovoltaic insect light trap aimed at managing pest populations, particularly in agricultural settings in India.
