

## SolarMax Energy Systems

# Solar PV system prices in Spain

## Overview

---

As of 2024, the average cost of solar panels in Spain ranges between €1,000 to €2,500 per installed kilowatt (kW). This means that for a typical home system of around 5 kW, you could expect to pay between €5,000 to €12,500 before any government incentives. How much do solar panels cost in Spain?

For installations of less than 10 kWp, the most common for homes, the amount can reach up to €600 per kWp. If you add a battery, you get a subsidy of €490 per kWh. Income Tax Deduction (IRPF). For the installation of solar panels in Spain, a discount of 20% to 60% can be obtained. This percentage varies depending on the autonomous communities.

How much does a photovoltaic system cost in Spain?

If we take into account that a typical household consumes around 4.4 kW, the initial cost of a project of these characteristics in Spain would be around €6,500 (plus VAT). However, having said that, the price of a photovoltaic system can vary greatly depending on different factors. The amount of energy you need is only one of these.

How much does a solar panel cost?

The possibilities are endless as is the case with the solar panels, inverters, depending mainly on whether they are connected to the grid or isolated from it. For normal power a home, between 3.5 kW and 5.5 kW, prices vary between 1,500 and 3,000 euros.

Should you install solar panels in Spain?

If you're reading this, it's very likely that you live in Spain or have a second home there. And you are looking for installing solar panels to save on your electricity bill. You want to forget the volatility of prices, and that's understandable.

How much does a solar self-consumption photovoltaic installation cost in Spain?

The price of a solar self-consumption photovoltaic installation for a single-family home is around €1,500 for each kilowatt generated (taxes not included). If we take into account that a typical household consumes around 4.4 kW, the initial cost of a project of these characteristics in Spain would be around €6,500 (plus VAT).

How much solar power will Spain have by 2026?

By 2026, nearly 29.3 gigawatts will have been installed in Spain, making Spain the second country in Europe with the most solar power. Such an increase is not surprising, given the number of sunshine hours in this country and the various incentives that have been implemented to facilitate the energy transition in homes and businesses.
