

SolarMax Energy Systems

Solar automatic tracking lithium battery charging system

Overview

This project aims to produce energy by maximizing the amount of solar energy that is absorbed, store it in a battery which has auto cut-off circuit to charge the battery, only to its required potential and stop the charging process and further convert the low voltage DC supply provided by the battery to a standard power supply i.e 230V/50 Hz AC supply.

Solar automatic tracking lithium battery charging system

LiTime Solar Charge Controllers for Sale -MPPT & PWM

Take charge of your solar power system with LiTime's smart charge controllers. Get maximum power point tracking, real-time monitoring, and auto-detection ...
