Solar panel assembly prices

Overview

The average cost of solar panel installation in the U.S. usually ranges from \$10,000 to \$25,000 before applying any incentives or rebates. Factors that impact this cost include panel type, roof structure, local labor rates, and permit fees. How much does a solar panel installation cost?

Expect to spend between \$1,000 to \$2,000 depending on system size. The average cost of solar panel installation in the U.S. usually ranges from \$10,000 to \$25,000 before applying any incentives or rebates. Factors that impact this cost include panel type, roof structure, local labor rates, and permit fees.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. 1,2,12 This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

How much does a 6 kW solar system cost?

Factors that impact this cost include panel type, roof structure, local labor rates, and permit fees. On average, homeowners pay between \$2.50 to \$3.50 per watt installed. For a typical 6 kW system, this comes out to approximately \$15,000 to \$21,000.

How much does a solar energy project cost?

Always ask your installer for a detailed quote to avoid surprises. A large-scale solar energy project cost can run over \$100,000. These projects involve land prep, panel procurement, storage systems, and labor—but benefit from commercial tax credits and long-term ROI.

How much does solar power cost in 2025?

Take control of your energy costs with solar power. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.
