

### SolarMax Energy Systems

### **Solar panel price cycles**

#### **Overview**

Let's break down the costs and explore what's driving the changes in solar panel pricing this year. Solar panel costs in 2025 depend on system size, installation, and region. The average cost per watt ranges from \$2.50 to \$3.50, translating to \$12,500 to \$17,500 for a 5-kilowatt system. Why do solar panels cost so much?

In the realm of solar panel costs, regional variations play a significant role, with prices influenced by factors such as local incentives, installation demand, and the overall solar market landscape. Examining the data on average solar panel costs per watt across different states provides insights into these geographical disparities.

How much do solar panels cost?

Data from the National Renewable Energy Laboratory (NREL) documented that residential solar panel installations cost about \$8.70 per watt in 2010, meaning the average 6 kilowatt (kW) solar installation in 2010 cost about \$52,200 before any incentives.

How much does a solar panel cost in 2025?

We also consider these data points in our solar panel scoring criteria. In 2025, the average cost of a solar installation is about \$19,000, or \$3.00 per watt, before any incentives are factored in. The industry standard for efficiency is between 19% and 22%, but we're beginning to see more panels with efficiency ratings above 22%.

How have solar panels cost and efficiency changed over time?

Let's take a look at how solar panel cost and efficiency have changed over time. Solar panels are about 60% cheaper and 40% more efficient than they were in 2010. Solar panels in 2010 cost about \$8.70 per watt and were about 15% efficient. Today, solar panels cost about \$3.00 per watt on average and are between 19% and 22% efficient.

How much does a polycrystalline solar panel cost?

Polycrystalline solar panels provide a cost-effective alternative, with prices typically falling between \$0.9 to \$1.00 per watt. Similar to monocrystalline panels, they offer an average lifespan of 25 to 30 years.

How much does a 5 kW solar system cost?

The installation cost of a 5 kW solar panel system, averaging around \$15,000, represents a significant upfront investment. However, this cost is offset by the long-term benefits of reduced energy bills and environmental impact.
