Solar panel projects under construction in northwest South America

Overview

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is.

SEIA does not guarantee that every identified project will be built. Like any other industry, market conditions may impact project economics and timelines. SEIA will remove a project if it is publicly announced that it has been canceled. SEIA actively.

What is the largest solar PV project in Latin America and the Caribbean?

The Villanueva solar PV plant, which has an installed capacity of 828 MW, is the largest project in Latin America and the Caribbean as of 2018 (Mexico). Ten countries from Latin America and the Caribbean committed to using 70 per cent renewable energy in their energy mix by 2030 during the COP 25 in Madrid in 2019.

Are solar power plants growing in Latin America?

Renewable energy sources, particularly photovoltaic, have grown exponentially throughout the region during the previous decade. The construction of major solar power plants in Latin America is one of the key trends in developing the local energy industry, alongside the growth of stand-alone power systems.

What is the major solar projects list?

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

Which countries are bringing solar energy to rural areas?

Chile is a leader in solar installations, with important projects such as green hydrogen. Argentina and Mexico have begun to increase their capacities in large-scale renewable energy. Colombia and Peru are bringing renewable energy to rural areas through solar programs.

Can Nicaragua build a solar power plant?

Nicaragua's Ministry of Energy and Mines inked an agreement with EPR in 2019 to build a 100 MW solar power plant with an expenditure of \$ 100 million. The first phase of Central America's largest photovoltaic plant has begun development (50MW). Investor Pedro Pajares is confident in Nicaragua's ability to build large-scale solar power projects.

How many solar projects are there?

There are more than 7,950 major solar projects currently in the database, representing over 340 GWdc of capacity. There are over 1,200 major energy storage projects currently in the database, representing more than 89,000 MWh of capacity. The list shows that there are more than 180 GWdc of major solar projects currently operating.
