

## SolarMax Energy Systems

# Solar panel skylight

## Overview

---

What is a solar skylight?

As we've explored, solar skylights are innovative installations that combine traditional skylights with the efficiency of solar power. They capture sunlight through solar panels, which then powers LED lights for both daytime and nighttime illumination.

What is a photovoltaic skylight?

Skylights, also known as roof lights or daylighting windows, enhance interior spaces with natural light and ventilation. Our Photovoltaic Skylight -or energy-generating skylights - does more than bring daylight indoors. It generates clean, renewable energy while offering bioclimatic properties for improved thermal comfort.

How does a solar powered skylight work?

The Solar Powered "Fresh Air" Skylight features a solar panel that captures any available daylight and is the power source that opens and closes the skylight. A rain sensor is built in to close the unit in the event that inclement weather arises while you're away.

How does the solar-powered Fresh Air skylight system work?

The Solar-Powered Fresh Air Skylight System includes a white, room-darkening solar-powered shade. It utilizes a solar panel to capture available daylight for opening and closing the skylight. A rain sensor is built in to close the unit in the event that inclement weather arises while you're away.

What is a VELUX solar powered skylight system?

VELUX Solar-Powered "Fresh Air" Skylight Systems provide energy-efficient natural light and ventilation. Enjoy the convenience of solar power and rain sensors. Browse our innovative designs today!.

How do solar skylights improve indoor air quality?

Moreover, solar skylights promote ventilation by offering the option to open or close them remotely. This feature enables fresh air circulation, enhancing indoor air quality. The smart sensors in Velux solar skylights ensure worry-free usage – they'll automatically close the skylight during rain or inclement weather.
