

## SolarMax Energy Systems

# Solar panel trends for the next week

## Overview

---

How much solar power does the US have in Q1 2025?

Solar accounted for 69% of all new electricity-generating capacity added to the US grid in Q1 2025. The US added 8.6 GW of solar module manufacturing capacity in Q1, bringing the total to 51 GW. However, growth in upstream manufacturing capacity remains slow or non-existent.

How did the US solar industry perform in Q1 2025?

The US solar industry installed 10.8 gigawatts direct current (GWdc) of capacity in Q1 2025, a 7% decline from Q1 2024 and a 43% decrease compared with Q4 2024 but still the fourth largest quarter on record. Solar accounted for 69% of all new electricity-generating capacity added to the US grid in Q1 2025.

What's happening in the solar industry?

NextEra expands West: Utah backs a 200MW Salt Lake City battery with a 25-year tax break, boosting grid stability & clean energy. 11.04 GW of new solar capacity in July, down about 48% YoY: China's PV sector sees a slowdown but shifts focus to quality and strategic. Trade wars & oversupply: India's solar industry at a crossroads.

What challenges will the US solar industry face?

The US solar industry also faces significant challenges due to recent federal actions, including proposed changes to tax credits that would effectively make them unusable for new projects in the near term and a shift in energy priorities towards fossil fuels, creating an uncertain environment for solar growth in the coming years.

How much new solar module manufacturing capacity was added in Q1 2025?

The U.S. solar industry added 8.6 gigawatts (GW) of new solar module manufacturing capacity in Q1 2025, marking the third-largest quarter for new

manufacturing capacity on record. U.S. Solar Market Insight® is a quarterly publication of the Solar Energy Industries Association (SEIA)® and Wood Mackenzie Power & Renewables.

Is the solar tracker market filling up?

The 100% domestic content solar tracker market is filling up. Since Nextracker claimed the “first” in December 2024, several oth. Solar tracker structures that can be mounted to “follow” the natural topography of a site can be a crucial factor in the technic. Most Californians still unprepared for wildfires and outages, Haven Energy.
