## Overview

What are the benefits of solar panels?

A key benefit of solar panels is their ability to produce electricity in remote locations. Providing there is an adequate supply of solar energy, solar panels can provide electricity to remote areas. This can help remote communities with no direct link to a nation's electricity grid.

What is a solar panel?

A Solar panels (also known as " PV panels") is a device that converts light from the sun, which is composed of particles of energy called "photons", into electricity that can be used to power electrical loads.

What are solar panels used for?

Solar panels allow us to generate electricity which we can then use in a variety of ways. In this article, we explain what solar panels are used for. In the sections below, we explain the different uses of solar panels. If you are more interested in the benefits, see our article on the pros and cons of solar energy.

How many kWh does a solar panel use a day?

Next, divide your monthly kWh usage by 30 to estimate your average daily kWh usage. The average American home uses about 900 kWh per month, so we'll use that in our example:  $900 \text{ kWh} / 30 \text{ days} = 30 \text{ kWh per day}$  Sunlight availability affects how much energy your solar panels generate.

What is solar energy used for?

Solar energy uses captured sunlight to create photovoltaic power (PV) or concentrated solar power (CSP) for solar heating. This energy conversion allows solar to be used to power auto motives, lights, pools, heaters, and gadgets. There's no doubt that the solar-powered products available on the market are increasingly complex.

How much solar energy does a home use per month?

The average American home uses about 900 kWh per month, so we'll use that in our example:  $900 \text{ kWh} / 30 \text{ days} = 30 \text{ kWh per day}$  Sunlight availability affects how much energy your solar panels generate. Use NREL's GHI maps to see how many sun hours you can expect to get in your location. Below is NREL's map for average annual sun hours in the US:
