

SolarMax Energy Systems

Solar panels generate electricity for own use

Overview

Photovoltaic panels are made from silicon cells that generate direct current electricity when sunlight excites electrons. With DC, energy flows in one direction. Homes, however, are wired for alternating current where the flow reverses many times per second to safely power appliances.

Solar panels generate electricity for own use

FLEXIBLE SETTING OF MULTIPLE WORKING MODES

Residential Solar Power How It Works And When It Pays Off

Learn how residential solar power works, why costs are falling worldwide, and how to calculate your payback period with clear examples and real data.

- LiFePO₄
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life:≥6000
- Warranty :10 years

The Complete Guide: How to Produce your Own Electricity

Discover how to produce your own electricity with solar and battery storage. This guide helps you achieve your goal of energy independence.
