

SolarMax Energy Systems

Solar panels photovoltaic panels 1 5 kilowatts

Overview

What does a 1.5kw solar system look like on a roof?

And here's what a 1.5kW system looks like on a roof (this one is made up of 9 x 165W panels – so it's a *really* old system): These days, because panels are both larger and more efficient, a 1.5kW solar system only requires 3 or 4: How much electricity will a 1.5kW solar system generate?

.

How much electricity does a 1.5kw solar system use?

These days, because panels are both larger and more efficient, a 1.5kW solar system only requires 3 or 4: How much electricity will a 1.5kW solar system generate?

A 1.5kW solar system will generate approximately 6kWh per day. This is under half the electricity consumption of the average aussie household.

How many solar panels do I Need?

To achieve a 1.5kW solar system, which is the desired capacity, you will require multiple solar panels. Since most panels available on the market are 300 watts each, you will need 5 or more panels to reach the desired capacity of 1.5kW. If you need different power requirements, check out 1 kW solar systems [How Big is a 1.5 kW Solar System?](#)

.

Do I need a 1.5kw solar system?

Whether or not you need a 1.5kW solar system will depend on many things. If you are a Residential customer and you use between 4.1kWhs and 9kWhs then a 1.5kW solar system could be a good choice to help reduce power bill costs. Solar Proof Quotes offer a quick and easy way to get 1.5kW solar system quotes.

How much roof space does a 1.5kw solar system need?

Back when they were popular a 1.5kW may have had six 250W solar panels. Each was around 1.6m x 1m, so you needed at least 10m² of roof space. To give you a feel for how big 10m² is this picture may help: And here's what a 1.5kW system looks like on a roof (this one is made up of 9 x 165W panels – so it's a **really** old system):.

Is a 1.5kw solar system a good value?

Due to a scheme called the “solar multiplier” you used to get twice the rebate for the first 1.5kW of any system, compared to subsequent kW. So in terms of dollars per kW, a 1.5kW system represented the best value. However, all that has now changed. The “solar multiplier” which favoured 1.5kW solar systems is gone. But don't panic!
