

SolarMax Energy Systems

Solar tracking system power generation

Overview

A solar tracking system (also called a sun tracker or sun tracking system) maximizes your solar system's electricity production by moving your panels to follow the sun throughout the day, optimizing the angle at which your panels receive solar radiation.

Solar tracking system power generation

Solar Tracking Systems: How They Work, Types and Advantages

A solar tracking system optimises the angle at which sunlight falls on the solar panels. It attempts maximum power generation by reducing loss in power production due to ...
