

SolarMax Energy Systems

South China Power Grid Solar Power Generation System

Overview

What is China Southern power grid?

China Southern Power Grid (“Southern Grid”) is one of China’s two major state-owned power distributors that serve five southern provinces: Guangdong, Guangxi, Yunnan, Guizhou and Hainan. The region has witnessed a rapid build-up of power generation capacity, from 275 GW in 2015 to 350 GW in 2020.

How many synchronous grids are there in China?

The State Grid Corporation and the China Southern Power Grid Corporation China today operates on two wide area synchronous grids: the State Grid in the North and China Southern Power Grid in the South. The grids are operated by two respectively named grid operating companies.

What is the biggest solar project in Southeast Asia?

3. Dau Tieng Photovoltaic Solar Power Project (500 MW) in Vietnam is the biggest solar project in Southeast Asia and the world's largest semi-immersed photovoltaic project.

Will China's electricity market promote grid parity?

China's electricity market is facing a series of reforms, which may further promote grid parity of PV power generation. The residential electricity price in China is controlled by the government based on cost-plus principle. The electricity price cannot reflect scale of product/service and market supply and demand .

How can PV power generation improve grid parity in China?

As a result, traditional producers and PV power generation may move towards a fair competitive environment, which is more conducive to grid parity of PV power generation. In addition, China's carbon trading is fully implemented in 2017, covering eight sectors including power sector.

How much solar power does China have?

In 2014, China's PV cumulative installed capacity reached 28.05 GW. Currently, supportive policies in China focus on the national level. Few of these policies consider regional difference, such as the distribution of solar radiation and economic development.

South China Power Grid Solar Power Generation System

Company Profile

CSG, CSG China Southern Power Grid Co., Ltd. (CSG), established on December 29, 2002, is a key state-owned enterprise under the direct management of the central government. As a ...
