

#### **SolarMax Energy Systems**

# Southeast Asia Industrial and Commercial Energy Storage Projects

#### **Overview**

Is Southeast Asia a good place to invest in energy storage?

Image: ACEN. There has been an uptick in energy storage investment in Southeast Asia, a region still largely powered by coal and experiencing high growth in population and energy demand. Andy Colthorpe speaks with companies working to establish a framework of opportunities in the region.

Why does Southeast Asia need flexible energy storage solutions?

Southeast Asia's exponential growth in electricity demand, averaging over 6% annually over the past two decades, has created an urgent need for reliable and flexible energy storage solutions. This surge in demand is primarily driven by increasing ownership of household appliances and rising consumption of goods and services across the region.

Why should businesses invest in solar energy in South-East Asia?

Business insights centering on South-east Asia's fast-growing economies. BESS can provide a stable and consistent energy supply despite disruptions or outages. For businesses, especially those already invested in solar energy, BESS helps to optimise energy usage, reduce costs, and enhance sustainability efforts.

Does ASEAN need energy storage?

The ASEAN energy storage landscape is undergoing a significant transformation driven by the region's ambitious renewable energy goals and growing energy demands. The ASEAN Centre for Energy (ACE) projects the region's total final energy consumption to increase by 146% by 2040, highlighting the urgent need for robust energy storage systems.
