# Spain s photovoltaic energy storage policy

ESS

## Overview

---

What are the targets for photovoltaic energy in Spain?

The targets for photovoltaic (PV) energy in Spain are outlined in the “Integrated National Energy and Climate Plan” (PNIEC). The 2023 update of the PNIEC, published in September 2024, sets the following targets for 2025 and 2030: • Total PV target for 2025: 46,5 GWn • Total PV target for 2030: 76,3 GWn • Self-consumption PV target for 2030: 19 GWn.

How does Spain support self-consumption solar PV?

Spain has implemented various support measures to encourage the adoption of selfconsumption solar PV systems: • Capital Subsidies: The Spanish government, through programs like the Next Generation EU funds, has provided subsidies to offset the initial costs of installing solar self-consumption.

How will the European Commission affect the photovoltaic industry in Spain?

The European Commission (EC) has presented 2 measures that will have an impact on the photovoltaic industry in Spain: The Net-Zero Industry Act (as a response to the US Inflation Reduction Act) and the REPower EU (as a response to the energy dependence).

Will Spain strengthen its electricity system after a power outage?

The Spanish government has approved legislation to strengthen its electricity system following the major power outage the country experienced in April.

How did Spain support self-consumption PV installations in 2023?

The primary support mechanisms for self-consumption PV installations in Spain during 2023 were regional capital subsidies (phased out by year-end) and income tax credits. New initiatives focused more on encouraging self-consumption and prosumer participation rather than reintroducing discontinued schemes like feed-in tariffs.

Who enforces the voltage control regulations in Spain?

Spanish independent competition regulator, the National Markets and Competition Commission (CNMC), will enforce the regulations. The watchdog will have to compile a monitoring report on compliance with the voltage control obligations of all operators who are obliged to do so. The report must be presented within six months.
