Overview

As of 2024, the average cost of solar panels in Spain ranges between €1,000 to €2,500 per installed kilowatt (kW). This means that for a typical home system of around 5 kW, you could expect to pay between €5,000 to €12,500 before any government incentives. How much does a photovoltaic system cost in Spain?

If we take into account that a typical household consumes around 4.4 kW, the initial cost of a project of these characteristics in Spain would be around €6,500 (plus VAT). However, having said that, the price of a photovoltaic system can vary greatly depending on different factors. The amount of energy you need is only one of these.

How much does it cost to install solar panels in Spain?

The cost of installing solar panels varies based on your energy needs and location in Spain. On average, it costs between €6,500 and €10,000 (excluding batteries). Eltex offers an all-in-one solution combining solar panels, energy storage, and smart power management, you can enjoy self-consumption and maximise your energy savings.

How much does a solar self-consumption photovoltaic installation cost in Spain?

The price of a solar self-consumption photovoltaic installation for a single-family home is around €1,500 for each kilowatt generated (taxes not included). If we take into account that a typical household consumes around 4.4 kW, the initial cost of a project of these characteristics in Spain would be around €6,500 (plus VAT).

Are solar panels a good investment in Spain?

With Spain's abundant sunshine, installing solar panels is a smart investment for both homes and businesses. Here's an easy-to-follow guide to help you understand the process and requirements for installing solar panels in Spain. This article is written by Eltex. There are many reasons people decide to go

solar.

Should you install solar panels in Spain?

If you're reading this, it's very likely that you live in Spain or have a second home there. And you are looking for installing solar panels to save on your electricity bill. You want to forget the volatility of prices, and that's understandable.

How much does a photovoltaic system cost?

The former cost between €115 and €220, without taking into account the assembly costs or the structure. If a house requires at least 3 kW to cover its energy consumption during certain hours of the day, it will need at least 6 panels of 450w. The cost to purchase these photovoltaic panels will be around €1,300 (excluding taxes).
