

## SolarMax Energy Systems

# Superimposed energy storage battery pack

## Overview

---

Why is a lead-acid battery pack used in a supercapacitor?

This synergistic operation favors an extended battery life. The lead-acid battery pack was proved effective in providing a sustained power for PV peak power shaving purposes, and also to limit the power ramp rate at the circumstance of exhausting the energy storage capacity of the supercapacitor.

Why does a supercapacitor pack have a long battery life?

Also, the power stress for the battery pack was limited within 13.2% and 15.5% of its rated capacity since most of fast response requirements were associated to the supercapacitor pack. This synergistic operation favors an extended battery life.

How does a hybrid storage system improve battery life?

The synergistic operation of the two storage technologies embedded into the hybrid solution, permits to reduce the total battery output (15% of total energy provided by the hybrid solution is through the supercapacitor pack), thus extending its lifespan. Fig. 10. Experimental results.

What is the energy storage solution?

The energy storage solution is creatively designed by the Seplos team, Based on this model, the energy investor can take advantage of this to build a battery factory to meet the needs of the local energy market.

What limits the power of a supercapacitor pack?

The maximum power for the battery and the supercapacitor packs are limited by the ratings of their respective dc-dc converters. The energy exchanged by these storage devices are also limited by their maximum and minimum predefined state of charge. This general picture can be graphically observed in Fig. 2. Fig. 2.

Why is Megapack a good battery storage product?

Megapack delivers more power and reliability at a lower cost over its lifetime. Each battery module is paired with its own inverter for improved efficiency and increased safety. With over-the-air software updates, Megapack gets better over time. Megapack is one of the safest battery storage products of its kind.
