

SolarMax Energy Systems

Suriname monocrystalline double-glass module manufacturer

Overview

What is a double-glass module?

Double-glass modules are characterized by increased reliability, especially for large-scale photovoltaic projects. They include better resistance to higher temperatures, humidity and UV conditions, and have better mechanical stability, reducing the risk of microcracks during installation and operation.

What makes Longi a leader in mono crystalline silicon technology?

Leader of mono crystalline silicon technology: LONGi has pioneered in diamond slicing wafer technology, which maximizes wafer output from the square rods and facilitated the M2 standards formation in this industry.

Are double-sided PV modules better than mono PERC modules?

Double-sided PV modules inherit all the advantages of mono PERC modules: high power density resulting in significant BOS savings, high energy yield with better performance in low light and lower temperature coefficient. In addition, double-sided PERC modules also collect energy from the rear side, showing a higher energy yield.

Suriname monocrystalline double-glass module manufacturer

16 Years manufacturer Mono-Crystalline 80W Solar Panel to ...

"Sincerity, Innovation, Rigorousness, and Efficiency" is the persistent conception of our company for the long-term to develop together with customers for mutual reciprocity and mutual benefit ...
