

SolarMax Energy Systems

Swedish photovoltaic cell panels

Overview

Are perovskite tandem solar cells a good choice?

Since perovskite tandem solar cells provide a much wider optical bandgap than conventional solar cells, they are a perfect option for being a top cell in a tandem solar cell. Evolar's technology is called PV Power Booster Line, which means that a thin-film layer of perovskite is applied by using Evolar's unique evaporation technology.

Who makes swemodule solar modules?

Solar Modules produced at SweModule by Renewable Sun Energy Sweden AB are designed for various markets and applications. High quality production, combined with strictest process control, ensure maximum lifespan and the highest performance. Next generation goes of grid. Read about the fully solar-panel driven Villa.

Can perovskite solar cells be combined with silicon cells?

Evolar offers a solution that enables industrial-scale production technology of perovskite solar cells to be combined with silicon cells into a tandem cell. Perovskite solar cells are made of synthesized material with a structure that makes them good for enabling low-cost and efficient photovoltaics.

Is evolar a good alternative to conventional solar cells?

According to Evolar, the solution is more energy-efficient and has the same manufacturing cost per watt as conventional solar cells. The cell efficiency is expected to increase up to 25 % compared to conventional cells by combining solar cells with Evolar's photovoltaic technology.

Swedish photovoltaic cell panels

Swedish Midsummer and Saab partner up in Thailand

Swedish solar cell maker Midsummer has teamed up with defense company Saab AB to explore the creation of a 200-megawatt solar cell factory in Thailand. The project aims to ...
