

## SolarMax Energy Systems

# Swiss energy storage battery equipment manufacturer

## Overview

---

Who makes Swiss clean battery?

When building the factory and equipping it with the necessary production facilities, Swiss Clean Battery draws on established and renowned partners. Jonas & Redmann (Berlin), Munters (Hamburg), Dalex (Knowledge) and Metha Bau (Amriswil), for example, are on board.

Which energy storage projects have been commissioned in Switzerland?

Axpo commissioned its BESS in February this year while utility Thurplus commissioned a 3MW system in September last year. But Switzerland was the location for one of the largest energy storage projects commissioned in recent years, a 20GWh pumped hydro energy storage (PHES) unit which started operations in June 2022 in the Canton of Valais.

Why should you choose Swiss clean batteries (SCB)?

Offering 50% better environmental performance and extended durability, SCB supports renewable energy transitions with advanced energy storage solutions and one of Europe's first mass production facilities. Swiss Clean Battery AG (SCB) is a pioneering manufacturer of solid-state batteries based in Frauenfeld, Switzerland.

Is MW storage the country's largest battery storage project?

MW Storage is a developer of BESS projects which is also active in the German market, with a 100MW/200MWh project underway that it claimed is the country's largest. The inauguration ceremony for the BESS project. Image: EWS AG. EWS AG and MW Storage have expanded a battery storage project in Switzerland to 28MW, making it the country's largest.

Is Bess being monetised in the Swiss electricity market?

It is being monetised in the Swiss electricity market by both CKW, part of Axpo, and utility Alpiq, the announcement said. The BESS is part of a network

of power plants, consumers and batteries, it added. The large-scale BESS market in Switzerland has been relatively quiet with renewable penetration on the country's grid still relatively low.

What is the market potential for stationary energy storage systems?

The market potential for stationary energy storage systems is enormous: according to current calculations, the demand for buffer storage systems is >100GWh (→ Source Fraunhofer). The battery itself is approx. 130x180x25mm in size and has a modular design. The cell design is prismatic and is surrounded by a stainless steel housing.
