

SolarMax Energy Systems

Swiss portable power supply production

Overview

What is the electricity mix in Switzerland?

The Swiss electricity mix varies from year to year, depending on the availability of different forms of production. Basically, around 60 percent comes from hydropower, around 30 percent from nuclear power and around 10 percent from new renewable energies. PV has been increasing for several years, while growth in wind power remains modest.

What is a Swiss Tech 200W power station?

Please try again later. Stay charged on your outdoor adventures with the Swiss Tech 200W Power Station! This reliable and compact portable power solution offers wireless phone charging, multiple ports for all your devices, and solar-ready capabilities. Whether you're camping, traveling, or facing an emergency, Swiss Tech has you covered.

How many electricity supply companies are there in Switzerland?

The electricity supply to Swiss end customers is ensured by some 630 electricity supply companies. Many of the municipal utilities are also responsible for supplying their customers with water and gas.

Does Switzerland produce electricity?

Over the year as a whole, Switzerland usually produces enough electricity to cover domestic consumption and can therefore export electricity. However, electricity production is particularly high in the summer, whereas in the winter in most years Switzerland is dependent on imports.

How big is the Swiss electricity grid?

The Swiss electricity grid is huge. It consists of over 250,000 kilometres of lines - and thus extends around the world more than 6 times. The Swiss electricity grid is divided into seven grid levels. These include extra-high voltage (380 kV/220 kV), high voltage (36 to 150 kV), medium voltage (1 kV to

36 kV) and the low voltage level (up to 1 kV).
