

## SolarMax Energy Systems

# Syria has several energy storage power stations

## Overview

---

Which power stations are in Syria?

This article lists all power stations in Syria. ^ "Aleppo Thermal Power Plant Syria - GEO". Global Energy Observatory. ^ "Al Nasryeh (Nasserieh) OCGT Power Plant Syria - GEO". Global Energy Observatory. ^ "Al-Zara Thermal Power Plant Syria - GEO". Global Energy Observatory. ^ "Latakia Power Plant Syria - GEO". Prime Ministry of Syria.

What if Syria doesn't have reliable energy supplies?

The lack of reliable energy supplies is a major concern for Syrian citizens and its new government, making it a key point of leverage. Qatar and Türkiye have stepped in to provide short-term assistance. The two states have provided two floating power stations, while Türkiye is also connecting its grid to Syria.

Why does Syria have a low electricity supply?

The war has seen a drop in electricity generation capacity from 8 500 Megawatts to just 3 500, primarily due to the destruction of key power plants including Mahardah, Aleppo and Zayzoun. The lack of reliable energy supplies is a major concern for Syrian citizens and its new government. Syria's oil and gas sector is in an even worse state.

What happened to Syria's electricity infrastructure before the 2011 conflict?

"Before the 2011 conflict, Syria's electricity infrastructure was barely functional. There were high production and transmission losses with frequent load shedding, especially in the summer. Syria had poor structural and performance indicators: power losses stood at nearly 26% and there were 43 days of power outage per year.

How many power plants were destroyed in Syria?

Between 2015 and 2017, violence and looting destroyed three major power plants, namely the Aleppo Thermal Station, Zayzoun in Idlib, and al-Taim in

Deir Ezzor. Pre-war, these three plants had accounted for almost one-fifth of Syria's total generation capacity.

What happens if a power station in Syria doesn't meet demand?

As of 2024 generation by power stations in Syria cannot meet demand, resulting in power cuts and air pollution from small diesel generators. The Ministry of Electricity aims to increase generating capacity to 12 GW by 2030.

## Syria has several energy storage power stations

---

### **Commercial Energy Storage Outlook 2025-2030** **-pknergypower**

Introduction Syria has endured over a decade of war, economic sanctions, and infrastructure collapse, which have collectively devastated its national power grid. Today, much of the ...
