

## SolarMax Energy Systems

# Tajikistan large-capacity energy storage power supply

## Overview

---

What is the share of thermal power plants in Tajikistan?

The share of thermal power plants is 318 MW or about 6.1%. Annual electricity generation in the Tajik energy system, consisting mainly of hydro power plants, is 16.5 billion kWh. It should be noted that more than 98% of electricity in Tajikistan is generated by hydropower plants, including 97% - by large and medium HPP.

Why should Tajikistan invest in hydropower?

Tajikistan's geographic proximity to some of the world's fastest-growing energy markets means that investing in developing its hydropower potential can contribute to regional energy security and the clean energy transition, in addition to addressing Tajikistan's high vulnerability to climate change and natural disasters.

How many hydropower plants are there in Tajikistan?

Currently, there are 11 large and medium hydropower plants in the Republic of Tajikistan and nearly 300 small hydro power plants with total capacity of 132 MW. In 2009 we adopted the updated program for the construction of small hydropower plants. The program envisages the construction of 189 SHPPs with total capacity of 103.6 MW.

Can Tajikistan's solar power be harnessed to meet energy-policy goals?

In addition to hydropower, Tajikistan's significant solar power potential could be harnessed to meet several energy-policy goals simultaneously, and the government has recently set a target for renewable energy to provide 10% of generating capacity by 2030.

How can Tajikistan improve its energy system resilience?

Tajikistan seeks to enhance its energy system resilience by reconnecting to the United Energy System of Central Asia. This effort is supported by large

infrastructure projects of common interests, such as CASA-1000 and the Rogun Hydropower Plant Project.

How much energy does Tajikistan import?

In 2022, Tajikistan's net energy imports amounted to 44,858 TJ, roughly 28% of total energy supply. In 2023, the oil and gas imports constitute the largest share of Tajikistan's imports value, which is 16.78% (approximately \$957,46 million).
