

SolarMax Energy Systems

Thailand s first-tier energy storage battery

Overview

Does Thailand need a battery energy storage system?

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see the country struggle to fulfil carbon neutrality and Net Zero commitments over the coming decades.

Who is the first EV battery manufacturer in Thailand?

BOI Secretary-General Narit Therdsteerasukdi stated that Sunwoda Automotive Energy Technology (Thailand) Co Ltd will be the first company in Thailand to manufacture EV battery cells. Previously, the BOI had approved 27.257 billion baht in investments from 41 companies, which focused on assembling imported battery cells into modules or OEM packages.

Will China invest 50 billion baht in EV battery factories in Thailand?

The Board of Investment (BOI) has approved investment privileges for a leading Chinese company specialising in automotive batteries and energy storage to invest 50 billion baht in building two EV battery cell factories in Thailand, the BOI chief announced on Thursday.

Why is battery storage a problem in Thailand?

This is partly due to a lack of clarity on how battery storage fits into existing electricity infrastructure. In 2022, the Thai government approved 24 BESS projects, all of which were located alongside solar operations. Their total combined storage capacity was 994 MW.

What is a battery energy storage system?

Battery energy storage systems (BESS) are essential for buildings and renewable power generation facilities to ensure uninterrupted electricity supply. Renewable sources like solar and wind power are intermittent, and influenced by weather patterns. BESS mitigates this issue by storing electricity

for future use.

How many mw can a solar generator store in Thailand?

Their total combined storage capacity was 994 MW. Interestingly, this allowed generators to sign semi-firm power purchase agreements (PPAs) with the Electricity Generating Authority of Thailand (EGAT) with minimum availability guarantees. Many solar projects in Thailand have non-firm PPAs in place due to a lack of storage on site.

Thailand's first-tier energy storage battery

Sunwoda to become Thailand's 1st EV battery cell manufacturer

Sunwoda will invest 50 billion baht to build Thailand's first EV battery cell factories, creating 4,000 jobs and boosting the country's EV industry.
