The Ministry of Communications will build 5G base stations free of charge

Overview

How many 5G base stations will China build next year?

China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

Will China upgrade its 5G mobile network to 5g-a level?

China will continue to accelerate the research, development, and innovation of 6G cellular technology and upgrade its 5G mobile network to reach 5G-A level in its new data infrastructure construction plan, a guidance released on Monday showed.

Will China maintain its leadership in 5G?

He indicated that China will strive to maintain its leadership in 5G, while planning and laying the foundation for research and development on 6G technology. Technicians of mobile network operator China Telecom set up a 5G base station near the Yellow River in Lanzhou, capital of northwestern Gansu province, on May 16, 2019.

How much will China invest in 5G network construction by 2025?

The China Academy of Information and Communications Technology estimated that Chinese telecom operators' investment in 5G network construction is likely to reach 1.2 trillion yuan by 2025. An additional investment of 3.5 trillion yuan is likely to flow into the upstream and downstream segments of the industrial chain as well as other related areas.

How big is China's 5G network?

The Chinese mainland currently has 1.425 million installed 5G base stations that support more than 500 million 5G users nationwide, which makes it “the biggest network [of its kind] in the world”, MIIT minister Xiao Yaqing said on Tuesday in a press briefing on the sidelines of the annual “two sessions”.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.
