

## SolarMax Energy Systems

# The classification of new energy battery cabinets includes

## Overview

---

What are the safety requirements related to batteries & Battery rooms?

Employers must consider exposure to these hazards when developing safe work practices and selecting personal protective equipment (PPE). That is where Article 320, Safety Requirements Related to Batteries and Battery Rooms comes in.

Are battery containment enclosures ul 1487 certified?

These products, through UL 1487 certification, can then provide another layer of safety for green energy. Battery containment enclosures certified by UL Solutions to UL 1487 can be found in the online certification directory, UL Product iQ®. Product iQ is available to use at no cost but requires a one-time registration.

What is a storage cavity energy containment rating (scecr)?

The storage cavity energy containment rating (SCECR) forms the basis of the size of the fuel package, and the storage cavity with the largest SCECR is tested. Second, there is an internal deflagration test that exposes the product to ignition of a standardized flammable mixture inside the product.

Is working on a battery considered energized electrical work?

Working on a battery should always be considered energized electrical work. NFPA 70E®, Standard for Electrical Safety in the Workplace®, Chapter 3 covers special electrical equipment in the workplace and modifies the general requirements of Chapter 1.

What are battery containment products?

In addition to these prevention strategies, battery containment products have emerged which are purpose-built for mitigation of thermal runaway hazards of lithium-ion batteries and battery-powered devices that are stored and charged inside of them. UL 1487, Battery Containment Enclosures, was created to

evaluate these products.

Do you need documentation before entering a battery room?

It is a requirement to have all the documentation in place prior to authorized personnel entering a battery room to perform a specific work task on a battery system under normal operating conditions. However, it is likely the employee will need to enter the battery room to deal with a battery system that is not operating normally.

## The classification of new energy battery cabinets includes

---

### Energy storage container

In the context of Energy Storage Systems (ESS), including Battery Energy Storage Systems (BESS), UL 9540 and 9540A standards have been developed. UL 9540 is the original
