

## SolarMax Energy Systems

# The function of base station emergency starting power supply

## Overview

---

Emergency power systems are installed to protect life and property from the consequences of loss of primary electric power supply. It is a type of continual power system. Overview An emergency power system is an independent source of electrical power that supports important electrical systems on loss of normal power supply. A standby power system may include a .

Emergency power systems were used as early as on naval ships. In combat, a ship may lose the function of its boilers, which power the for the . In such a case, one or more.
