Overview

What is the best portable power station?

The Goal Zero Yeti 1500X Portable Power Station (updated model from the 1000X we tested) remains our favorite thanks to its ample power and potential to supply even more backup power by connecting additional Yeti batteries. Not only can it power tablets, phones, and flashlights, but it also powers appliances and power tools.

What is the power output of a portable power station?

Power output of a portable power station refers to the maximum amount of energy the station delivers to the attached devices. Power output ratings are available in terms of wattage. How many watts a device will deliver explains how much power it can produce. The more watts a device can produce, the larger the electrical component it can run.

Do portable power stations need a wall outlet?

Portable power stations typically come equipped with lithium-ion batteries that hold a significant amount of stored electrical energy. Most power stations plug directly into a standard electrical outlet, but many models don't require access to a wall outlet.

How do I know if a portable power station is good?

Check the output wattage and battery capacity to see what a portable power station is capable of. The Westinghouse iGen160s is a basic little power station capable of keeping your electronics charged during a brief power outage or camping trip. I like that it has a flashlight (perfect for getting set up in the dark when the power is out).

Should you buy a power brick or a portable power station?

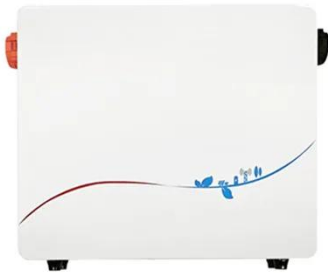

Small power bricks have enough juice to charge your phone a few times, while a cooler-sized portable power station can keep vital electronics running during

a power outage or camping trip, and the most powerful options will provide electricity to your entire house.

What is a portable power station & why should you use it?

This portable power station is great for photographers and other content creators, since it's very lightweight and has fast USB charging for cameras and video cameras, and it's especially good for charging up drones. It's quiet, too, so you don't need to worry about annoying anyone when using it in the field.
