

SolarMax Energy Systems

The latest requirements for new energy storage in Mauritius

Overview

Does Mauritius need a battery energy storage system?

Mauritius aims to increase the share of renewable energy sources in its energy mix, which leads to fluctuating power injection. To reduce this fluctuation from variable renewable energy sources, the installation of Battery Energy Storage Systems (BESS) is required.

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

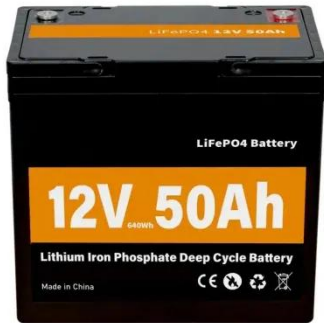

What is the Smart Grid Roadmap for Mauritius?

The Smart Grid Roadmap for Mauritius was launched in December 2018 to help the CEB integrate new technologies in the power system, enhancing reliability, safety, and security.

Can offshore wind farms be developed in Mauritius and Rodrigues?

Preliminary research carried out by the Mauritius Research Council (MRC) shows potential for the development of offshore wind farms in the waters of Mauritius and Rodrigues.

The latest requirements for new energy storage in Mauritius

Mauritius: Qair awarded four Solar PV and Battery Storage

Bambous, March 1, 2023 - Qair, an independent renewable energy producer, announces the signature with the Central Electricity Board (CEB) of four power purchase agreements for ...
