

## SolarMax Energy Systems

# The lifespan of photovoltaic inverters

## Overview

---

Solar inverters last 10–15 years on average, with microinverters and power optimizers often lasting 20+ years. Heat, quality, installation, and maintenance heavily influence lifespan. Regular check-ups, proper placement, and using quality parts extend durability. How long do solar inverters last?

Solar inverters are an important part of any solar power system, converting the DC electricity generated by the solar panels into AC electricity that can be used by your home or business. Solar inverters typically have a warranty of 5 to 25 years, and most manufacturers estimate that their products will last for at least 20 years.

Are solar inverters durable?

Although most modern solar inverters meet the IP65 protection rating, making them suitable for outdoor environments, harsh conditions can still accelerate aging and reduce lifespan. The following environmental factors significantly impact inverter durability:.

How long do string inverters last?

EnergySage said that a typical centralized residential string inverter will last about 10 to 15 years, and thus will need to be replaced at some point during the panels' life. String inverters generally have standard warranties ranging from five to 10 years, and many have the option to extend to 20 years.

When should you replace a solar inverter?

If you have a solar inverter, you may be wondering when you should replace it. There are a few things to keep in mind when making this decision. First, the average lifespan of a solar inverter is about 10 years. This can vary depending on the quality of the inverter and how well it is maintained.

How long do microinverters last?

Microinverters have a longer life. EnergySage said they can often last 25 years

- nearly as long as their panel counterparts. Usually, these inverters have a 20 to 25-year standard warranty included.

How long does a battery based inverter last?

Battery-based inverters tend to provide shorter warranty periods, generally between 2 to 5 years. It's essential for you to compare these lengths as they imply manufacturers' confidence about their product's durability.
