## Overview

---

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a CPV solar system cost?

Concentrated photovoltaic (CPV) panels are \$0.80 to \$1.10 per watt. While not as well-known as other types of panels, CPV panels are highly efficient and may grow in popularity. A 6 kW solar system would cost \$4,800 to \$6,600. A single solar cell costs about \$0.30 and most panels use 60 or 72 cells. The more cells in a panel, the higher the cost.

Are solar panels expensive?

No, solar panels in the USA are not considered expensive. On average, a 6.6 kW solar panel system typically costs around \$16,000, not considering government incentives and rebates. Solar panel costs in the US usually range from \$4,500 to \$36,000, or \$1.00-\$3.60 per watt (W).

How much does a roof solar panel system cost?

The cost of expanding a roof solar panel system depends largely on the number of solar panels. Typically, homeowners need to pay around \$1000 for the installation (including plans and permits) and then around \$500-\$700 per

new panel.

How much does solar installation cost?

On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system. What else affects solar installation costs?
