

### **SolarMax Energy Systems**

# The price of energy storage cabinet batteries has dropped

#### **Overview**

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024. How much does a battery storage system cost?

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024.

Why are battery prices dropping?

The quoted battery prices have dropped to \$1,133 per kilowatt-hour of energy storage capacity -- a 16% drop from last year. Lower battery costs are a result of streamlined manufacturing processes, especially in China, and the decreasing cost of materials. 70% of the world's lithium-ion cell production happens in China, according to IDTechEX.

How does EnergySage track home batteries and solar panels prices?

EnergySage used quotes customers received through its website from January to June 2024 to track the prices paid for home batteries and solar panel systems. The quoted battery prices have dropped to \$1,133 per kilowatt-hour of energy storage capacity -- a 16% drop from last year.

Are home batteries a good investment?

The average cost consumers are paying for home batteries has fallen to a record low, according to a new report. Home batteries like the Tesla Powerwall 3 are gaining popularity as their prices drop and consumers see how they can help them save on energy bills.

Are home batteries cheap?

Home batteries have never been cheap, with most costing thousands (if not

tens of thousands) of dollars. A recent report from EnergySage reveals that battery prices have hit a record low. EnergySage used quotes customers received through its website from January to June 2024 to track the prices paid for home batteries and solar panel systems.

Why are home batteries gaining popularity?

Home batteries like the Tesla Powerwall 3 are gaining popularity as their prices drop and consumers see how they can help them save on energy bills. Home batteries have never been cheap, with most costing thousands (if not tens of thousands) of dollars. A recent report from EnergySage reveals that battery prices have hit a record low.
