

SolarMax Energy Systems

The safest lithium battery pack

Battery String-S224

- 1C Charge/Discharge
- Easy configuration and maintenance
- Power supply can be single battery string or parallel battery strings

Overview

LiFePO₄ (Lithium Iron Phosphate) batteries are widely regarded as the safest lithium battery option available today. Their unique chemistry provides excellent thermal stability, reducing the risk of fires and enhancing overall safety compared to other lithium battery types.

The safest lithium battery pack

Lithium Ion Battery

Possible causes of lithium-ion battery fires include: over charging or discharging, unbalanced cells, excessive current discharge, short circuits, physical damage, excessively hot storage ...
