The value of solar panels

Overview

Do solar panels increase home value?

In many cases, solar panels can increase your home's value. While they require substantial upfront costs, solar panels can increase your home's value by about 4%, according to Zillow. Some research has also shown that homes that have solar panels tend to sell faster than those without them.

Do solar panels increase resale value?

Installing solar panels can significantly increase your home's value, with studies showing an average premium of \$15,000 for homes with solar installations. This boost in property value varies depending on your location, system size, and local energy costs, but homeowners typically see a 3-4% increase in their home's resale value.

Are solar panels worth it?

Solar panels are worth it if you already own your property, are dealing with high energy bills and can get solar panels installed that don't come with a huge price tag. It's even more worth it when you can take advantage of tax credits, incentives and rebates.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much do Solar Homes sell for?

On average, across the United States, homes with solar sell for 6.9% more than homes without solar. The sale price increases by about \$25,000 for a home with solar. Four out of the 36 states in our study saw an increase of less

than 2% on homes with solar. In one state (Alabama), non-solar homes sold for about 5% more than comparable solar homes.

Are solar homes worth more than non-solar homes?

While the average U.S. home with solar sold for 6.9% more than a comparable non-solar home, the data varied between states. Of the states in our study, 44% saw higher margins than the U.S. average, while 66% saw lower margins. Here are a few examples of states with higher and lower added value: We looked at homes in 62 distinct cities.
