

SolarMax Energy Systems

There are photovoltaic sites in the Netherlands

Overview

Nearly 80% of solar power installed in the Netherlands in 2017 was for small systems of less than 10 kW, a large part being rooftop Solar PV. Larger systems over 500 kW accounted for just 6.9% of the total. By the end of 2018 private residential rooftop systems had an installed capacity of 2,307 MW, businesses rooftop systems 1,662 MW whilst solar parks amounted to 444 MW.

Netherlands generates solar-powered energy from 13 solar power plants across the country. In total, these solar power plants has a capacity of 245.1 MW. How much electricity is generated from solar farms each year?

There are photovoltaic sites in the Netherlands

Top five solar PV plants in operation in the Netherlands

Of the total global solar PV capacity, 1.63% is in the Netherlands. Listed below are the five largest active solar PV power plants by capacity in the Netherlands, according to ...
