

## SolarMax Energy Systems

# Total investment in Senegal energy storage power station

## Overview

---

Built with an estimated investment of €40 million (US\$46.5 million), the project was funded by Africa REN, Dutch development bank FMO, and the Private Infrastructure Development Group (PIDG)—partially through its Emerging Africa & Asia Infrastructure Fund (EAAIF). How will Senegal's power sector be strengthened?

Senegal's power sector would be strengthened by continued diversified investment in power, including renewables and natural gas, while phasing out heavy fuel oil. Senegal Energy Outlook - Analysis and findings. An article by the International Energy Agency.

Does Senegal have energy independence?

The facility provides energy independence, decreasing import prices with Senegal's projected oil and gas output. The €154 million project was finished on time in February 2023 and improved Senegal's electricity generation by 8%.

When will West African energy open a gas power station in Senegal?

West African Energy, a Senegalese energy company, plans to open Senegal's first and largest 300 MW combined cycle gas power station in January 2024.

What is Senegal's largest gas-to-power plant?

The project, which is scheduled to begin construction in 2024, will be Senegal's largest gas-to-power plant, producing 360 MW from natural gas supplies. It will also run on light crude oil as an alternative fuel.

Will Senegal's economy grow six-times bigger in the AC?

Senegal's economy could grow six-times larger in the AC while limiting growth in energy demand to three-times its current level by utilising new gas resources and boosting the use of renewables in power. In the AC, gas meets a growing share of energy demand while traditional use of biomass starts to

decline in rural areas. IEA. Licence: CC BY 4.0.

What is Senegal's 125 MW coal-fired power station?

Senegal's Sendou coal-fired power station, with a capacity of 125 MW, has surpassed heavy fuel oil generators as the country's most cost-effective source of baseload power. The project, which has been ongoing since 2007, is a regional success. It intends to enhance Senegal's power dependability and cost through a "Build, Own, and Operate" model.
