

## SolarMax Energy Systems

# Türkiye Photovoltaic Energy Storage Ratio Company

## Overview

---

Does Türkiye have storage-integrated solar power?

In the area of storage-integrated solar power, Türkiye is making significant progress. As of 2024, 412 solar power plants with storage, representing a combined installed capacity of over 14 GW, have received pre-licenses. This figure far exceeds the 2.1 GW storage capacity target set in the NEP for 2030.

How much solar energy does Türkiye have?

Türkiye's solar energy capacity doubled from 9.7 GW in July 2022 to exceed 19 GW by the end of 2024. By August 2024, the country had already exceeded the 18 GW target set for 2025 in the National Energy Plan (NEP) by the Ministry of Energy and Natural Resources (MENR).

Can Türkiye use untapped solar power to accelerate solar energy momentum?

Türkiye could utilize untapped capacities to advance solar energy momentum through floating, storage-integrated, hybrid and rooftop solar potential. The country has a pipeline of 33 GW in pre-licensed storage-integrated solar and wind projects, far exceeding the official 2030 target of 2.1 GW.

How big is Türkiye's energy storage capacity?

Türkiye's 35 GWh storage capacity accounts for grid-scale projects alone. Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe.

How has Türkiye doubled its solar capacity?

Türkiye has doubled its solar capacity in just 2.5 years, surpassing its current target more than a year ahead of schedule. The progress underlines the opportunity for an upgraded target in its upcoming Nationally Determined Contribution. Available in: Türkçe.

## Does Turkey have a Solar Energy Breakthrough?

Turkey's solar energy breakthrough The facilitation of self-consumption-focused power plant installations in Türkiye has accelerated annual new installations, pushing solar energy capacity beyond the current 2025 target. Türkiye's solar energy capacity doubled from 9.7 GW in July 2022 to exceed 19 GW by the end of 2024.
