

SolarMax Energy Systems

Türkiye s new energy photovoltaic power generation photovoltaic site

Overview

Does Turkey have a Solar Energy Breakthrough?

Turkey's solar energy breakthrough The facilitation of self-consumption-focused power plant installations in Türkiye has accelerated annual new installations, pushing solar energy capacity beyond the current 2025 target. Türkiye's solar energy capacity doubled from 9.7 GW in July 2022 to exceed 19 GW by the end of 2024.

How many solar panels are produced in Türkiye?

With solar PV installations exceeding 9 GW in less than 10 years, the PV panel production market has also expanded. There are more than 30 solar module manufacturers in Türkiye which have a total module production capacity of over 12 GW per year.

Does Türkiye have storage-integrated solar power?

In the area of storage-integrated solar power, Türkiye is making significant progress. As of 2024, 412 solar power plants with storage, representing a combined installed capacity of over 14 GW, have received pre-licenses. This figure far exceeds the 2.1 GW storage capacity target set in the NEP for 2030.

Can Türkiye use untapped solar power to accelerate solar energy momentum?

Türkiye could utilize untapped capacities to advance solar energy momentum through floating, storage-integrated, hybrid and rooftop solar potential. The country has a pipeline of 33 GW in pre-licensed storage-integrated solar and wind projects, far exceeding the official 2030 target of 2.1 GW.

Where are Türkiye solar panels made?

The solar panels in the facility come from Türkiye's first integrated solar ingot-wafer-module-cell production factory in Ankara, which was established by Kalyon Solar Energy Technologies Production Company and started production in August 2020.

How much solar energy does Türkiye have?

Türkiye's solar energy capacity doubled from 9.7 GW in July 2022 to exceed 19 GW by the end of 2024. By August 2024, the country had already exceeded the 18 GW target set for 2025 in the National Energy Plan (NEP) by the Ministry of Energy and Natural Resources (MENR).
